### Summary of Qualifications:

---

I am a Bachelor of Information Systems graduate from Faculdade Prominas, with a solid professional trajectory of over 14 years as a Web Developer.

My experience spans significant participation in various projects, where I served not only as a developer but also as a driver of innovation and continuous improvement.

I have specialized in the development of web applications, websites, and mobile apps, possessing a proven track record in these implementations.

I possess strong knowledge in creating WordPress themes and plugins.

Skills: React, React Native, Node.js, Next.js, Python, Django, Flask, PHP, Laravel, CakePHP, HTML, CSS, Bootstrap, Tailwind, JavaScript, JQuery, SQL database management.

### Academic Background:

---

Bachelor's Degree in Information Systems - Prominas Colleges

### Professional Experience

---

#### Senior Full Stack Web Developer at CNN Brasil

Period: 02/2024 - Present

Currently, I work as a Senior Full Stack Web Developer at CNN Brasil through Pasquali Solution. I am responsible for developing and implementing technological solutions that optimize user experience and improve operational efficiency.

#### Key Responsibilities:

- **Front-end and Back-end Development:** Creation and maintenance of functionalities in WordPress VIP environments, using React to develop custom blocks in the Gutenberg editor, providing a modern and efficient user experience.
- **API Integration:** Development and integration of RESTful APIs to facilitate communication between applications, improving information exchange and overall application functionality.
- **Proof of Concept with Next.js:** Actively involved in a proof of concept using Next.js, exploring new approaches to optimize performance and scalability in upcoming projects.

- **Business Rule Development:** Creation and implementation of complete business rules, ensuring that technological solutions meet business and operational requirements.
- **Multidisciplinary Collaboration:** Collaborative work with teams of developers, design, product, and operations to develop solutions that align technical and business goals, ensuring high-quality delivery.

**Technologies and Tools:**

- PHP, JavaScript, React, Next.js, HTML5, CSS3
- WordPress VIP (plugin and theme development)
- RESTful APIs
- Git and GitHub for version control
- Azure DevOps

With a constant focus on code quality and innovation, I aim to align technological solutions with CNN Brasil's strategic goals, contributing to efficient and impactful results.

**Web Developer - Lumidea Design & Web**

Duration: 03/2010 a 12/2023

I specialized in the development and maintenance of websites and web applications, using the most advanced technologies available in the market.

My approach to development is guided by the use of agile methodologies and the application of leading-edge frameworks and platforms, including Bootstrap for responsive design, React for dynamic user interfaces, Laravel and CakePHP for robust backend development, and WordPress for manageable content solutions.

This combination of tools and practices allows me to deliver innovative projects and high-quality solutions, optimizing the development process to ensure efficiency and effectiveness in project delivery.
